How To Take An Oil Sample

Step 1: TURN ON ENGINE AND LET RUN FOR A FEW MINUTES
Have your pump, sample bottle and tube ready

Step 2: Slightly unscrew copper grommet and push tube through.

Step 3: screw on sample bottle snuggly.
You are ready to sample!

Step 4: Insert tube into dipstick, make sure tube is deep, but isn’t touching the bottom

Step 5: Pump, oil will fill sample bottle. When you have enough oil, slightly unscrew bottle to release pressure and oil will stop pumping. And you’re done!

Step 6: Screw lid back on to sample bottle and fill out ALL paperwork and send it to us!

!!VERY IMPORTANT!!
